

In order to keep pace with the ever-changing fast-paced scenarios in the field of dentistry and to keep the community abreast with the latest developments, it is of utmost importance for a professional institution to have its own journal. It gives me immense pleasure in introducing the DJAS in its new avatar in association with Jaypee Brothers Medical Publishers (P) Ltd. from 2023 onwards.

I take this opportunity to wholeheartedly congratulate the Editor-in-Chief Prof Dr Tarun Kalra and the editorial team for their hard work and dedication to further uplift the journal.

I wish to thank and acknowledge the contribution of authors from India as well as international forums who have spared their valuable time and efforts to publish, share and collaborate for creation of a better tomorrow for our coming generations.

The authors are encouraged to submit their articles at www.djas.org. While submitting, they need to strictly adhere to the International Committee of Medical Journal Editors (ICMJE) guidelines and ensure that their content is free of plagiarism. Plagiarized content will lead to immediate rejection of the article and the author might be barred from making further submissions to the journal.

This journal is an excellent dedication to the professional development of dentistry and has received support and encouragement from various eminent personalities and societies in dental and oral health sciences research.

Let us all come together to take the journal to the next level where the journal will be known not only in India but also overseas. To accomplish this, the editorial board encourages reviewers to assess the content in a proactive manner and authors to submit their highest quality work. We are hopeful that in the coming years the journal will scale new heights of global recognition.

We are confident that with the combined efforts of our editorial board, authors, and reviewers, the journal will make a significant impact in the field of dentistry.

Mr Vikram Bhojia
